

Jr. Software Applications Engineer

N2 Imaging Systems is an industry leader in the design and manufacture of compact, low power advanced infrared and visible imaging components and systems. We have a long history of product delivery for use by the soldier for vision enhancement, surveillance, detection and targeting during day, night and low visibility conditions.

Job description:

N2 is looking for a highly motivated individual to join our team. We have an immediate position available for a Microsoft C# .NET Software Developer. The candidate is expected to produce software given a functional description and inputs from other design staff members. Besides design and development, duties will include integration and testing of software and systems, as well as manufacturing support of the N2 product line.

Required skills:

- Object Oriented Design principles.
- Software design, development and testing.
- Knowledge of SQL Server.
- Experience designing Graphical User Interfaces using Windows Forms and/or WPF.
- Familiarity with binary math and manipulation.
- Computer networking and troubleshooting skills.
- Good interpersonal and communication skills.
- Ability to work well in a team environment.

Desired skills:

- Programming skills in C++ on Windows.
- Familiarity with hardware, RS-232, USB, etc.
- Experience with image processing applications.

Experience and Education:

- B.S. Computer Science \ Computer Engineering or related major.
- 0 - 3 years of experience in Microsoft C# .NET.

Citizenship requirements:

Applicants must be a U.S. Citizen or Permanent Resident.

N2 Imaging Systems offers a competitive salary and comprehensive benefits package (medical, dental, vision, 401k, PTO, etc.). N2 Imaging Systems is an equal opportunity employer committed to a diverse workforce.
