

Sr. Quality Engineer

PURPOSE:

N2 Imaging Systems is an acknowledged leader in the design and manufacture of compact, low power, visible and infrared imaging systems used for soldier vision enhancement, targeting, and surveillance during day, night or low-visibility conditions. Our vertically integrated company, including operations and engineering staff are experienced veterans in providing low-power, lightweight solutions for capturing imagery across the spectrum. Our passion for supporting the Warfighter and their mission demands excellence in everything we do, from the talent we recruit to the highly-engineered systems we deliver.

N2 Imaging Systems is seeking a highly motivated, Sr. Quality Engineer whose primary responsibilities are to provide quality engineering services to our manufacturing and assembly teams, in the areas of electronic, opto-electronic and mechanical assembly. The candidate will interface with customers, suppliers and other organizations within our business enterprise.

The candidate must be able to provide a positive interface with our government and prime contractor quality representative.

JOB RESPONSIBILITIES:

- Investigating and resolving non-conformances and quality escapes by utilizing industry and N2 investigation tools and practices, and driving initiatives to implement robust root cause, corrective actions, and preventive actions.
- Collecting, analyzing and using data to drive process/design continuous improvements.
- Coordinating first article inspections, contract reviews, and supporting all aspects of project/product development and/or production, review of designs, specifications and drawings.
- Assisting Quality Engineering management and other functional managers to implement and develop process and product/design improvements.
- Maintain inspection performance metrics, coordinate & participate in time study activities.
- Interface with engineering/contractors to perform failure analysis and determine root cause and corrective actions.

Education and/or Certification requirements:

- Bachelor's degree required
- Professional Quality Certification a plus

Experience / Qualifications:

- Minimum of 5+ years' experience in the Aerospace & Defense and/or commercial R&D and Manufacturing industry
- Must possess the ability to work well with others in a team environment, and lead as appropriate to ensure team success. Prior team leadership roles a plus.

- Must be a self-starter, effective communicator and possess the ability to organize and plan your work schedule
- Must be knowledgeable of manufacturing and inspection processes and methods, as well as the ability to read and interpret engineering drawings and other engineering technical data
- Must have participated in Material Review Board (MRB) processes with the ability to analyze non-conformances for disposition
- Must be able to support and conduct internal quality audits and interface with third party auditors when required, including experience with ISO-9001 audits and compliance
- Supervisor experience in a manufacturing environment.

Qualified applicants may forward a detailed resume with complete experience history. Those who appear best qualified, based on the written information submitted, will be contacted. N2 Imaging Systems offers a competitive salary and comprehensive benefits package (medical, dental, vision, 401k, PTO, etc.). N2 Imaging Systems is an equal opportunity employer committed to a diverse workforce.

Applicants must be a U.S. Citizen or Permanent Resident.
